# NVIDIA

## GRAPHICS

## AI

# NVIDIA GAMEWORKS

<https://developer.nvidia.com/what-is-gameworks>

## NVIDIA GameWorks Ray Tracing (RTX)

NVIDIA GameWorks™ SDK will add a ray-tracing denoiser module. The Ray Tracing Denoiser is a set of libraries that enables fast, realtime ray tracing by utilizing denoising techniques

## NVIDIA GameWorks VisualFX

NVIDIA VisualFX provides solutions for high quality visual effects that leverage GPU computing and graphics capabilities

## NVIDIA VRWorks™

NVIDIA VRWorks™ is a comprehensive suite of APIs, libraries, and engines that enable application and headset developers to create amazing virtual reality experiences

## NVIDIA PhysX SDK

NVIDIA PhysX SDK is a scalable multi-platform physics solution supporting a wide range of devices, from smartphones to high-end multicore CPUs and GPUs

## NVIDIA Core SDK

NVIDIA Core SDK is a collection of loosely coupled SDKs and APIs that allow your game to better integrate with NVIDIA platform

## NVIDIA GameWorks™ Samples

Graphics and compute samples for OpenGL, Vulkan and DirectX developers, showing cutting edge rendering and graphics techniques for games

# NVIDIA GAMEWORKS RAY TRACING (RTX)

## Applications in Games

### Higher quality in-game rendering

- ❑ Reflections
- ❑ Ambient Occlusion
- ❑ Shadows

### Content Creation Workflows

- ❑ Light baking
- ❑ Cinematic rendering
- ❑ Path traced reference

### Non-rendering applications

- ❑ Audio simulation in VR (VRWorks Audio)
- ❑ Physics / Collision detection
- ❑ AI

UNREAL ENGINE

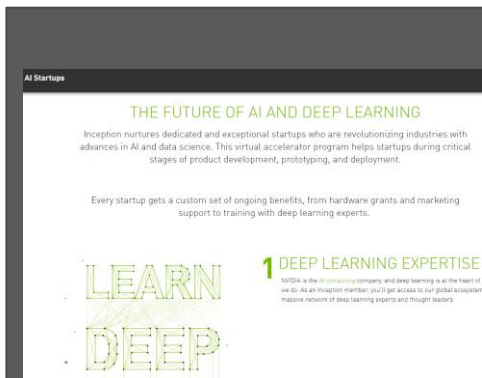

# NVIDIA RESOURCES FOR AI/ML/DL

## Deep Learning Institute

Training materials  
hands-on labs  
Self-paced courses  
Hand-on Degree Program

[www.nvidia.com/DLI](http://www.nvidia.com/DLI)

## Inception for AI Startups

Access to NVIDIA tech GPU  
and AI experts Global  
marketing/sales GPU venture  
introduction

[www.nvidia.com/inception](http://www.nvidia.com/inception)

## GPU Technology Conference (GTC)

GTC is the largest and most  
important event of the year  
for GPU developer

[www.gputechconf.com](http://www.gputechconf.com)

## NVIDIA AI Technology Center

NVAITC leads development  
of technical solutions and  
architectural design for  
Deep learning, Data  
visualization, Accelerated  
Computing.

# DEEP LEARNING FOR GAME DEVELOPMENT

## Deep Learning for Game Development

This workshop provides hands-on training on the latest techniques for designing, training, and deploying neural networks for game development. By the end of the workshop, you'll understand how a neural network can animate characters without artist input, learn how a network trained on unpaired image collections can map an image from one style to another, and train a deep reinforcement agent to play *Starcraft II*.

<b>Duration:</b>	8 hours
<b>Price:</b>	\$10,000 for groups of up to 20 (price increase for larger groups). During the workshop, each participant will have dedicated access to a fully configured, GPU-accelerated workstation in the cloud.
<b>Assessment type:</b>	Multiple-choice
<b>Certificate:</b>	Upon successful completion of the assessment, participants will receive an NVIDIA DLI certificate to recognize their subject matter competency and support professional career growth.
<b>Prerequisites:</b>	Basic familiarity with deep learning concepts, such as convolutional neural networks (CNNs); experience programming in Python
<b>Languages:</b>	English, Chinese
<b>Tools, libraries, and frameworks:</b>	TensorFlow, Theano

# NVIDIA DEVELOPER COMMUNITY

The screenshot shows the top navigation bar of the NVIDIA Developer website. It includes the NVIDIA logo and the text 'NVIDIA DEVELOPER' on the left, and 'NEWS', 'BLOG', and 'FORUMS' in the center. On the right, there is a search icon, 'Join', and 'Login' links. Below this is a secondary navigation bar with categories: 'RTX', 'GAMEWORKS', 'DESIGNWORKS', 'VRWORKS', 'HPC', 'METROPOLIS', 'DRIVE', 'CLARA', and 'OPEN SOURCE'. The main banner features a large green headline: 'DO MORE WITH MIXED PRECISION TRAINING'. Below the headline is a sub-headline: 'Get greater GPU acceleration for deep learning models with Tensor Cores'. A green 'Learn More' button is positioned to the left of a 3D visualization of a neural network. The visualization shows a central green cube with a grid of nodes on top, connected to various icons representing different applications like a car, a person, and a server.
